THE HIGHLY POTENT MARIJUANA OF TODAY IS DIFFERENT FROM THE 1990s. Marijuana flower averages more than 20% THC in states that have commercialized it, and processed cannabis, dab/wax/shatter, up to 90% THC.

Usage by kids and young adults has markedly increased with retail marijuana sales. Marijuana is the number one substance found in Colorado suicides, ages 10-19 years old.

MARIJUANA DOES NOT CURE CANCER.
MARIJUANA DOES NOT HELP COMMON PAIN CONDITIONS.
MARIJUANA IS NOT CURBING THE OPIOID CRISIS; COLORADO HAD RECORD NUMBERS OF OVERDOSE DEATHS IN 2016 AND 2017.

Dedicated to those who have lost loved ones due to marijuana. To join the Colorado and national pushback against cannabis, visit PopPot.org & MomsStrong.org.
